### Technical data

#### Electrical data
- **Nominal voltage**: AC 24...240 V / DC 24...125 V
- **Nominal voltage frequency**: 50/60 Hz
- **Nominal voltage range**: AC 19.2...264 V / DC 21.6...137.5 V
- **Power consumption in operation**: 6 W
- **Power consumption in rest position**: 2.5 W
- **Power consumption for wire sizing**: 9.5 VA
- **Auxiliary switch**: 2 x SPDT, 1 x 10% / 1 x 11...90%
- **Switching capacity auxiliary switch**: 1 mA...3 A (0.5 A inductive), AC 250 V
- **Connection supply / control**: Cable 1 m, 2 x 0.75 mm²
- **Connection auxiliary switch**: Cable 1 m, 6 x 0.75 mm²
- **Parallel operation**: Yes (note the performance data)

#### Functional data
- **Torque motor**: 10 Nm
- **Torque fail-safe**: 10 Nm
- **Direction of motion motor**: selectable by mounting L/R
- **Direction of motion fail-safe**: selectable by mounting L/R
- **Manual override**: by means of hand crank and locking switch
- **Angle of rotation**: Max. 95°
- **Angle of rotation note**: adjustable starting at 33% in 2.5% steps (with mechanical end stop)
- **Running time motor**: 75 s / 90°
- **Running time fail-safe**: <20 s / 90°
- **Running time fail-safe note**: @ -20...50°C / <60 s @ -30°C
- **Sound power level, motor**: 45 dB(A)
- **Mechanical interface**: Universal shaft clamp 10...25.4 mm
- **Position indication**: Mechanical
- **Service life**: Min. 60'000 fail-safe positions

#### Safety
- **Protection class IEC/EN**: II reinforced insulation
- **Protection class UL**: II reinforced insulation
- **Protection class auxiliary switch IEC/EN**: II reinforced insulation
- **Degree of protection IEC/EN**: IP54
- **Degree of protection NEMA/UL**: NEMA 2
- **Enclosure**: UL Enclosure Type 2
- **EMC**: CE according to 2014/30/EU
- **Low voltage directive**: CE according to 2014/35/EU
- **Certification IEC/EN**: IEC/EN 60730-1 and IEC/EN 60730-2-14
- **Certification UL**: cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1:02
- **Certification UL note**: The UL marking on the actuator depends on the production site, the device is UL-compliant in any case
- **Mode of operation**: Type 1.AA.B
- **Rated impulse voltage supply / control**: 4 kV
- **Rated impulse voltage auxiliary switch**: 2.5 kV
- **Control pollution degree**: 3
- **Ambient temperature**: -30...50°C
- **Storage temperature**: -40...80°C
- **Ambient humidity**: Max. 95% r.H., non-condensing

### Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the actuator and that is ensured that the ambient conditions remain at any time within the thresholds according to the data sheet.
- Caution: Power supply voltage!
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer’s site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/safety extra-low voltage is not permitted.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

### Product features

- **Mode of operation**
  The actuator is equipped with a universal voltage feed module that can utilise supply voltages of AC 24...240 V and DC 24...125 V. The actuator moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the fail-safe position by spring force when the supply voltage is interrupted.

- **Simple direct mounting**
  Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

- **Manual override**
  By using the hand crank the damper can be actuated manually and engaged with the locking switch at any position. Unlocking is carried out manually or automatically by applying the operating voltage.

- **Adjustable angle of rotation**
  Adjustable angle of rotation with mechanical end stops.

- **High functional reliability**
  The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

- **Flexible signalization**
  The actuator has one auxiliary switch with a fixed setting and one adjustable auxiliary switch. They permit a 10% or 11...90% angle of rotation to be signaled.

### Electrical installation

**Notes**
- Caution: Power supply voltage!
- Parallel connection of other actuators possible. Observe the performance data.

Operating controls and indicators

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

1. Manual override
   Turn the hand crank until the desired switching position is set.

2. Spindle clamp
   Edge line displays the desired switching position of the actuator on the scale.

3. Fasten the locking device
   Turn the locking switch to the „Locked padlock“ symbol.

4. Auxiliary switch
   Turn rotary knob until the notch points to the arrow symbol.

5. Unlock the locking device
   Turn the locking switch to the „Unlocked padlock“ symbol or unlock with the hand crank.

6. Cable
   Connect continuity tester to S4 + S5 or to S4 + S6.

7. Manual override
   Turn the hand crank until the desired switching position is set and check whether the continuity tester shows the switching point.
